

FHIR for Medication Definition Connectathon Track

**STARTS 30 minutes later than on main
agenda at 8:30 PST (4:30 GMT)**

Rik Smithies

Jan 14th-**15th**, 2021

Welcome back

- Quick huddle
- Report any progress, any blockers, any requests and any plans
- Today we need to:
 - Log what we have done, in general. I can collate a document.
 - Please send me anything you want to be mentioned
 - Specifically log what parts of what resources we have used
 - Sheet: https://drive.google.com/file/d/1oDKQxomxc-789B_j4zDYE33V_1_NDo-D/view?usp=sharing
 - (I have not logged any of mine yet...)

Update from me...

- **Loaded up some realistic products e.g.**
 - 3 anonymised real EMA products
 - Equilidem-contained
 - Injectulin-contained
 - SuperPodhaler-contained
- <https://fhir-connectathon-server-ema.azure-api.net/MedicinalProductDefinition/Equilidem-contained>

Update from me...

- **Also 100 products from UK dm+d (national drug catalogue)**
- Mapped to FHIR (obviously)
- Can be accessed using their SNOMED-CT code as their id
- <https://fhir-connectathon-server-ema.azure-api.net/MedicinalProductDefinition/406310005>
- a few examples:
 - 406310005 Lidocaine 50mg/10ml (0.5%) solution for infusion ampoules
 - 412373007 Diphtheria + Haemophilus influenzae type B + Pertussis + Tetanus vaccine
 - 11750811000001103 Peppermint water BP 1973

Update from me...

- Also working, with Andrei, on the viewer. It works on preloaded things but not yet fully on newly loaded things, we are working to fix that.
- Example:
- <https://fhir-connectathon-server-ema.azure-api.net/html/products/cdf1aed6-081a-4886-abaa-546192b997dc>
- Does most of the resources but not yet SubstanceDefinition, task for today
- (demo of output)
