PE WG Priorities summary July 14, 2020

Patient Empowerment

Exported on 07/14/2020

Table of Contents

No headings included in this document

Updated July 14 to cull out earlier notes & refocus on moving forward in the HL7 process. Co-chair Virginia Lorenzi[1] will shepherd this aspect.

Project, etc, of interest	Engage with:	Project lead/s	Status / next step
These two are new to HL7 - we created Project Proposals, which were approved, so we're working on Project Scope Statements (PSS) per templates at Project Proposals Home[2] (new HL7 process for 2020)			
Corrections to errors in the record As always in HL7 this is not about the sociological processes, it's about the data elements required to enable a corrections workflow.	n/a - new	Interim leads: Debi Willis[3] Abigail Watson[4]	Project proposal 1559 approved: Patient Corrections to errors in the record[5] Populate the draft PSS[6] - it's nearly empty
Patient-Contributed Data This is intentionally distinct from existing terms such as PGHD (patient-generated health data). Patient-contributed data can include observations, preferences, goals, anything that comes from the patient side of the clinical relationship.	n/a - new	Jan Oldenburg[7] Maria D. Moen[8]	Project proposal 1655 approved: Create a white paper on patient contributed data[9] Finalize the **draft PSS**[10] (needs to be changed into new format - see Virginia Lorenzi[11])
These two priorities have existing WGs with whom we'll engage:
